### PROFILE

**Aleksandar** is a skilled QA Automation Tester with nearly three years of expertise in manual and automated testing, particularly within the payments industry. Renowned for his problem-solving mindset and ability to uncover critical issues, he thrives in collaborative, cross-cultural environments. Aleksandar consistently delivers high-quality software solutions by combining his technical proficiency with strong teamwork and communication skills, making him a valuable asset to any organization aiming for excellence in software quality.

### WORK EXPERIENCE

#### Automation Tester, Endava, Skopje

June 2022 - Present

Pioneered end-to-end testing initiatives for merchant onboarding and POS device ordering systems, achieving a 40% increase in test coverage and reducing defect rates by 30%. Collaborated extensively with cross-functional teams to streamline workflows and ensure seamless alignment of business objectives with technical execution. Implemented advanced testing methodologies, enhanced automation frameworks, and conducted rigorous performance testing to guarantee system reliability under high-demand scenarios. These efforts resulted in elevated product quality, improved customer satisfaction, and optimized operational efficiency across the entire delivery pipeline.

#### SA-MP Developer (Self - Employed), Remote

Successfully managed server hosting, overseeing the setup, maintenance, and optimization of file systems and server configurations. Streamlined processes for player interaction management by developing efficient systems to handle real-time requests and data exchanges. Implemented advanced security protocols to safeguard systems from vulnerabilities, ensuring data integrity and privacy. Enhanced server performance through optimization techniques, reducing downtime and increasing response efficiency. Demonstrated expertise in troubleshooting and proactive issue resolution, ensuring uninterrupted operations and a seamless user experience.

### EDUCATION

2019-2023

#### Bachelor of Computer Science

Computer Systems and Technologies | SWU Neofit Rilski

**GPA:** 3.8 / 4.0
